

ACP Lectureship Tour to Thailand

“New Paradigm in Asymmetric Cu(I) Catalysis”

Motomu Kanai

Graduate School of Pharmaceutical Sciences, The University of Tokyo, Japan

It was my great honor to have a precious opportunity of ACP lectureship tour to Thailand from November 22 to 27, 2009. My tour was colorful with a lot of joy and stimulation through discussion with many excellent professors and students in Thailand. This was my first visit to Thailand. I felt, in many occasions during my tour, very strong spirit for developing forward to the future. I wish that I can keep the spirit also for myself and my science. This was a truly fruitful lectureship tour for me, and I hope the same for people who I met in Thailand. I sincerely thank all the professors, especially Professor Montakarn Chittchang, who kindly arranged my tour.

Nov 23 (Mon): Chulabhorn Research Institute (CRI)

Nov 24 (Tue): Chulalongkorn University

Nov 26 (Thu): Mahidol University

Nov 27 (Fri): Burapha University
